RENEW DMC™ Modernization Solution

RENEW DMC

Introducing our **RENEW DMC™** modernization solution offering customers five key hydraulic products in one, reducing complexity and loss of valuable time.

WHAT'S INCLUDED

Every **RENEW** solution has been designed to simplify your demanding modernization projects. We have selected the best components from the Vantage product portfolio, delivering you a renewed elevator to delight your customers.

From controller and drive unit to door equipment and signal fixtures, our packages are well engineered, quick to install, easy to maintain, and deliver years of reliable performance -all from names you have come to rely on, including:

CONTROLLER 1

SUBMERSIBLE PUMP UNIT 2

DOOR EQUIPMENT 3

FIXTURES 4

ELECTRICAL PACKAGE 5

PRICING INCLUDES SHIPPING COST 6

WHY

There are 80,000 DMC units still in service, but Dover DMC elevators are no longer supported by their manufacturer. The time has come to modernize, replace critical components with our latest code compliant technology to ensure maximum elevator performance and reliability.

RENEW DMC™ complies with all of the latest codes.

DOOR EQUIPMENT

GAL is the first name in non-proprietary door equipment to satisfy all applications.

Available options include the door operator only or our full door equipment solution.

- Closed-loop feedback ensures superior door control
- Simple 'Plug & Play' light curtain integration
- Serial communication protocol (CAN), which can be used with all Vantage control systems
- A customized door equipment package can be provided for existing Dover drilled doors, including the Dover Unistrut hatch set up.

Vantage also offers complete replacement door solutions from qualified industry partners.

CONTROL SYSTEMS

Vantage offers the eHydro and PIXEL HYDRO control solutions.

- 3 points of access, facilitating easy car diagnostics and performance adjustments
- Intuitive, easy-to-learn full-color user interface
- Fully-integrated Absolute Positioning System, that provides exact car position at all times
- We offer pre-mounted, pre-wired, pre-tested controllers mounted on the pump unit
- Easy to wire
- Optional battery lowering unit

OPTIONAL PUMPING UNITS

Bore-Max offers submersible pump units built to withstand decades of trouble-free service.

- Easy access, removable motor, and pump chassis assembly to improve maintenance and servicing
- Multiple tank capacities

CONFORMS TO ASME A17.1-2019/B44-19

ELECTRICAL PACKAGES

Vantage understands what is needed to ensure a successful modernization project, down to the last nut and bolt.

- Pre-engineered Basic or Full electrical package
- Pre-labeled and color coded traveling cable
- Full installation instructions and set-up guides
- Technical support readily available

CAR OPERATING PANEL RETROFIT KIT

IMPULSE+

The **Impulse+** retrofit kit is designed as a drop-in replacement for the Dover Impulse hydraulic elevator fixture. It offers a turnkey solution that improves the look of your elevator while increasing its reliability.
