

Nexus

Hydraulic Controller

TECHNOLOGY REDEFINED SIMPLICITY AT ITS CORE

Vantage is pleased to introduce the next chapter in control technology – Nexus. The Nexus hydraulic control system offers unparalleled install ability and adjustments. Designed and built based on the voice of Vantage’s broad customer base, Nexus incorporates the features that elevator contractors find most valuable and reduced costs. The Nexus technology platform is combined with our new Self-Service Portal making end-to-end estimating, pricing and ordering streamlined and simplified.

BENEFITS

- **Faster installation:** reduced number of field wires allows for faster installation and less errors
- **Configurability:** controller is fully configurable to allow for field modifications without software changes
- **Troubleshooting:** 7" touch screen provides clear presentation of information to allow the user to quickly troubleshoot and restore service
- **Safety:** Independent Safety Monitoring Circuits for EPDs
- **Remote Monitoring:** Remote monitoring ready with Vantage Connect

TECHNICAL SPECIFICATIONS
